Paid credit risk modeler internship at Luminor, application deadline is 3rd of April

Luminor is looking for an intern for the Credit Risk Modellers team as part of the ILLUMINATE 2023 internship program. The internship is well suited for those who are interested in the further development of credit risk modelling methodologies and wish to improve their skills in using the R programming language and KNIME software. During this time, the intern has 2 main tasks: 1. Review/develop the credit risk model, which estimates how much of the unused limit (e.g. in the case of credit cards) the customer is expected to use by the time he becomes insolvent. 2. Familiarize with the process of regular model monitoring and contribute to the implementation of the process on the KNIME platform.

What We Offer:

- **2 months duration.** Starting from 26th of June until 29th of August
- **Location.** Tartu
- **International teams.** Teams that go outside Pan-Baltic boarders where people value challenging work together with good humor and having fun
- **Wellbeing.** Access to tools and resources that help to feel good and be productive at work and in life
- **Professional growth.** Internal and external training programs, workshops, conferences, online training etc.
- **Technical necessities.** From laptop to monitors for your home office set-up
- **Gross salary.** 950 EUR/month

Application and more information about the summer internship in the Risk Department can be found [HERE](#).
