Creditstar Group AS is looking for a:

Data Analyst

As an Analyst, you are expected to:

- Compile and preprocess raw data for machine learning
- Perform ad hoc analyses and compile reports
- Test and monitor predictive models
- Cross-validate results obtained by other team members
- Test and employ scripts written by other team members
- Work with an open-source tool stack consisting of Python, SQL and UNIX bash

You are a good candidate if you:

- Have a quantitative background in a field such as physics, biology, chemistry, economics, mathematics, engineering etc.
- Have a working knowledge of mathematical statistics
- Have experience conducting research
- Are proficient in using Excel
- Have experience with any scripting language (preferably Python)
- Have an inquisitive mindset, are attentive to detail and results-oriented
- Have experience working in research or as an analyst
- Speak fluent English

We offer:

- Dynamic and challenging work in a growing international company
- Diverse and friendly international team
- An opportunity to join the 2016 European Business Awards-winning company
- A competitive remuneration package
- A work schedule accommodating your studies if needed
- Most importantly – a challenge

Creditstar Group is a rapidly growing international consumer finance company, headquartered in Tallinn, Estonia and operating in multiple European markets.

As we are expanding into new markets, our need for data science is growing. As a key member in our Data Science team, you will work closely with other team members to improve our ability to leverage vast amounts of data.

The Data Science team develops automated methods for evaluating prospective customers and predicting their future financial behavior. We also work closely with our in-house marketing team and third parties to improve targeted advertising.

The techniques we use include statistical modeling, machine learning, customer segmentation via cluster analysis and natural language processing.

Work location:
Ülemiste City, Lõõtsa 5, Tallinn, EE

Point of contact and additional information:
Karl Märka, Head of Data Science
