A Belgian Space Technology company Space Application Services (https://www.spaceapplications.com/) is looking for people to fill in vacant positions in the company. The reason is that the company is trying to get bigger in order to fulfill the need for our products on the market as well as to increase the capacity of the RnD department.

If you are interested in any positions, do not hesitate to contact me (andres.kaosaar@spaceapplications.com) in order to get further information about the positions and applying process.
